FÖR NATURLIG LIVSKRAFT

What is Green arena?

- Developing farms on the countryside offering services within social care, education and health.
- The environment on the countryside together with the animals on the farm and the nature are an important part of the concept.

We have developed Green Arena concepts within three areas

- Social care
- Education
- Health and recreation

How become a Green Arena-farm?

- Six day course, 950 euro + tax
- Approved Green Arena-farm 500 euro + tax
- About 80 farms all over Sweden

Challenges ahead (and today)

- Buisness!
- Long term conditions
- Give the farms energy to keep on selling

Challenges ahead?

- More cooperation within the sector
- Political influence
- Supporting system from official Sweden

Research needed?

- Economy within the sector – official benefit
- We know enough, don't we? ;)

We want to be like Norway! 😊
